

16th Statistical Leaders Meeting

Monday 12th May – Tuesday 13th May 2025

Ferring, Amager Strandvej 405, DK-2770 Kastrup, Denmark

This year's meeting will focus on these key topics:

1. Academic Alliances: Universities and Pharma Nurturing NextGen Talent [led by Kyle, Anna, Mikala, Per, and Bjarke]

The session will explore the journey of Next Gen Statisticians into the Pharma industry, and the role Statistics Leaders can play in shaping University education programs and attracting future talent.

2. Innovative clinical trial methodologies and their adoption - Priorities and Opportunities [led by Mouna Akacha]

In this session we will discuss the need and priorities for fit-for-purpose clinical trial methodologies. Collaborative opportunities and synergies between EFSPi Stats Leaders and EFSPi Stats Methods leaders will be explored.

3. Irrelevant and out of touch? [led by Simon and Frank]

At the 14th EFSPi leaders' meeting we heard from career young statisticians about what they needed from us. But what do we need from them? How do we make sure we don't become irrelevant ourselves?

A keynote speaker will join us on Day 2 to discuss patient centered drug development, share latest initiatives and solicit feedback on how leaders are getting involved and prepared.

Topic co-chairs & Organizing committee:

Kyle Raymond, Associate Director, Global Biometrics - Ferring Host & Topic 1 co-chair
Anna Huusom, Senior Director, Biostatistics & Data Science - Lundbeck & Topic 1 co-chair
